## Lift Foils Personal Watercraft

**WHO IS IT FOR?** Adventure-seekers that want to elevate their surfing.

This is the board for anyone who has flirted with the idea of surfing. It took co-founder Nick Leason 10 years to create the eFoil, an electric surfboard that can glide over water at up to 35mph. He applied technology for smartphones, electric vehicles, and drones to build a personal watercraft that let riders fly above water without the need for wind or waves. In the process, he also created a new term for electric surfboarding – “foiling.” A range of models is available for all thrill-seekers, risk-takers, and watersports enthusiasts of various levels.

The LIFT3 F is the brand's newest, most user-friendly, and price-accessible board. Prices start at \$9,995 (Light battery) or \$10,995 (Full range battery).

LIFT 3 boards feature an updated shape for increased aerodynamics and maneuverability, upgraded extra-durable construction, extended ride time, and the highest speed on the market, gliding through any body of water at up to 36 mph.
